Career Objective

Year 3 Computer Science undergraduate at Universiti Malaysia Sabah seeking a Data Analyst internship. Interested in using Python, SQL, Excel, and data cleaning to turn operational data into clear business insights.

Education

Universiti Malaysia Sabah (UMS)

Bachelor of Computer Science, Year 3

Expected Graduation: May 2026

Relevant coursework: Database Systems, Data Structures, Statistics, Machine Learning, Data Visualization, Software Engineering.

Technical Skills

- Python
- SQL
- Microsoft Excel
- Pandas
- NumPy
- Data Cleaning
- Exploratory Data Analysis
- MySQL
- Git
- HTML
- CSS

Soft Skills

- Communication
- Teamwork
- Presentation
- Problem Solving
- Documentation

Projects

Student Attendance Analysis

- Cleaned messy attendance records with Python and Excel.
- Used SQL queries to join student, course, and attendance tables.
- Identified attendance patterns by course, week, and student group.
- Presented findings in a short written report for a lecturer-style stakeholder.

E-Commerce Sales Insight Mini Project

- Analyzed sample sales data using Python, Pandas, and Excel.
- Calculated monthly revenue, average order value, and top product categories.
- Wrote a short business recommendation based on customer purchasing trends.

Database Coursework: Internship Tracker

- Designed a MySQL schema for student internship applications.
- Wrote SQL queries for filtering, grouping, and summarizing application status.
- Documented entity relationships and example queries.

Experience

Academic Project Team Member

Universiti Malaysia Sabah | 2025

- Worked with a small team to build a student-focused web prototype.
- Prepared project documentation and presented progress updates.
- Supported data entry, testing, and feature validation.

Certifications

- Google Data Analytics Foundations
- Kaggle Python Micro-Course
